

Medicare Annual Readiness for Techs

2026-2027 PAS Edition

Overview

A predetermination review takes place when the Provider/Member has requested a future year coverage determination in advance

- Predetermination reviews begin October 15th – December 31st of each year for all accounts that are effective January 1st of the next year
 - Prior authorization requests may be received prior to the member's coverage being active. Predetermination reviews should only be performed for applicable clients during the predetermination period. The Prior Authorization department will not perform predetermination reviews outside of this period
 - For Example: If the member's account becomes active on January 1st and a request was sent in on October 3rd, the request would be cancelled as Not Yet Eligible
- Between 10/15 thru 12/31, requests for members who are NOT found in PAS will be cancelled as "member not found" and will not be tracked (this includes new Book 1 clients).
- After 10/15, if a new member is found in PAS with future year eligibility (i.e., only future eligibility exists), accept that all requests for that member are predetermination requests. Be sure to select the pre-benefit determination flag and notate in the Call Detail as described in this training video.

- **MASSCO Medicaid with the carrier code MPDMACSP will follow the predetermination processes outlined in this job aid.**
- **Unless otherwise specified in this job aid, Book A clients do not allow for predetermination review. Do not select the Pre-benefit Determination flag for Book A clients that do not allow for predetermination review.**
- **The predetermination reviews outside of the predetermination period logic does not apply to members with a Business Segment of UHCMR MAPD & PDP in PAS. For more information on this, reference the UHCM&R Non-Annual Enrollment Period (AEP) Reviews section of the [Medicare Overview for Techs Job Aid](#).**

Determining if a Predetermination is Being Requested – ePA Requests

In order to receive a predetermination review, the provider or member must specifically request a predetermination review (i.e., agents should not solicit predetermination reviews). If a predetermination review is not specifically requested, agents should proceed with entering the request **per standard current year processes**.

- Beginning 10/15, the ePA portal will accept predetermination requests. When the following question is asked and the provider indicates that the request is a predetermination request (i.e., the answer reflects 2027), **agents must also determine if a current year review is required**.
- This question may appear anywhere in the clinical guidelines (i.e., it may not be the first question) so be sure to review the clinical guidelines in their entirety.

Is your request for the current benefit year (2026) or the next benefit year (benefits starting 1/1/2027)? SELECT 2026 if your request is for this benefit year (for example, patient is new to therapy and requires drug in 2026, you received a transition of care letter, the patient has a current authorization which ends prior to 12/31/2026). SELECT 2027 if your request is for the next benefit year (for example, therapy will NOT begin BEFORE 1/1/2027, the patient is a newly enrolling member effective 1/1/2027, the patient has an approval that expires on 12/31/2026 or later).

2027

If an ePA case indicates that the request is a predetermination request and the Pre-benefit determination flag has not been selected, the case must be reworked and the Pre-benefit Determination box checked.

Determining if a Predetermination is Being Requested – Fax Requests

In order to receive a predetermination review, the provider or member must specifically request a predetermination review (i.e., agents should not solicit predetermination reviews). If a predetermination review is not specifically requested, agents should proceed with entering the request **per standard current year processes**.

- Check all images for indications of a predetermination request.

Determining if a Predetermination is Being Requested – Phone Requests

Callers must state that they are requesting a future year review for a phone request to be considered a predetermination request (i.e., **agents should not ask the caller if the request is a predetermination request**).

Member Initiated Requests

- Check for notes that may indicate a predetermination request, such as "Requesting CD in advance – Future Coverage Year".
- Always start with the current year review, then proceed to the future year review.
 - MPA requests for non-diabetic supplies initiated by phone technicians require a paperclip notation with the following formatting:
 - Subject: Future Year Predetermination Request
 - Verbiage: Member requesting predetermination review
- If a member requests a future year review, but the provider responds without indicating a current year review is being requested, you will treat the request as a **future year** review according to the member's request.

Entering Predetermination Requests

Predetermination requests will be received via phone calls, standard PA request fax forms, Member Initiated requests, ePA and the web (through the web portal). When entering predetermination requests, utilize the following processes:

- If a current year account is displayed in PAS, select that account first to ensure current year review is not needed. Once you have addressed current year, continue with predetermination request
- Ensure the Pre-benefit Determination flag is selected on all predetermination requests.
 - Current year reviews should **NOT** have the predetermination flag selected
 - Notice that when the Pre-benefit Determination flag is selected that the Req PA Start Date will default to 1/1/2027 and cannot be changed.

Predetermination Addendum

The predetermination addendum will automatically be placed on letters for all predetermination requests (e.g., approvals, denials, cancellations).

Additional Drug Details

Identify Caller Type → Identify Provider → Identify Member → Identify Claims → Identify Drug → Drug Details

Tier Exception/Copay Reduction : ☐ Yes ☐ No

Req PA Start Date (This is for back dating only) 01/01/2027

Drug Approval Level : GPI 12

Predetermination Requests Received Prior to 10/15

The prior authorization department cannot accept predetermination request prior to 10/15/2026. If a predetermination request is received prior to 10/15, please follow the steps outlined below:

- Cancel the case as Not Yet Eligible. No tracking will be required. The member/provider will need to resubmit the case on or after 10/15.
- This does not apply to members without current coverage and with a Business Segment of UHCMR MAPD & PDP in PANDA. For these members, reference the UHCM&R Non-Annual Enrollment Period (AEP) Reviews section of the Medicare Overview for Techs Job Aid.

See the Book A Predetermination Reviews section below for information on Book A predetermination requests received before predetermination review is allowed.

Call Scripting for Predetermination Requests Prior to 10/15

The prior authorization department cannot accept predetermination request prior to 10/15/2026. If a phone predetermination request is received prior to 10/15, please use the suggested scripting below:

Member Requests:

"For your convenience, the Prior Authorization Department will begin to review pre-benefit determinations for 2027 on October 15th. We will not be able to hold or accept requests until that day. Either you or your provider can call back on or after October 15th and we will be happy to process your request."

Provider Requests:

"For your convenience, the Prior Authorization Department will begin to review pre-benefit determinations for 2027 on October 15th. We will not be able to hold or accept requests until that day. Please call back on or after October 15th and we will be happy to process your request."

Pre-Benefit Determination Flag

- You can determine if the pre-benefit determination flag has been selected by looking in the status bar of PAS. If the Pre-benefit Determination field reflects True, the case has been entered for predetermination review. When the pre-benefit determination flag is selected, future year guidelines will be pulled into the case if they are loaded in PAS and the medication start date will default to 1/1 of the following year.

A screenshot of a software interface, likely the PAS (Patient Assessment System) status bar. It displays several fields with their corresponding values. The fields are: SLA Goal (blurred), SLA Deadline (blurred), PA Type (PAREqd), Priority (STANDARD), and Pre-benefit Determination (True). The 'Pre-benefit Determination : True' entry is highlighted with a red rounded rectangle.

SLA Goal :	
SLA Deadline :	
PA Type :	PAREqd
Priority :	STANDARD
Pre-benefit Determination :	True

Knowledge Check #1

Q: If an ePA case indicates that the request is a predetermination request and the Pre-benefit determination flag has not been selected, what action must be taken?

A: The case must be reworked (using Copy Case) and the Pre-benefit Determination box must be checked.

Q: Anytime a predetermination request is received, what are you required to do on the case?

A: Must Check Pre-benefit determination flag

Q: Why is it important to ensure the Pre-benefit determination flag is checked for all predetermination requests?

A: To ensure the start date of the case reflects 1/1/future year

A: To ensure future year criteria is utilized for review

Q: If a fax request is received with a previous year predetermination box checked, is it a valid predetermination request?

A: Yes! Even if the form itself indicates predetermination for a previous year, we will still accept it as a predetermination request for future year coverage

Q: If a predetermination request is received and the member does not have future coverage, what action must be taken?

A: Agent will verify if review is required for current year and proceed accordingly (be sure to document as necessary)

A: Agent will select members current coverage account and proceed with predetermination review

Selecting Correct Member Coverage

Selecting the correct member coverage prior to 10/15:

- Until the predetermination period begins, agents should only select current member accounts when current and future coverages are located
 - As a reminder, the current coverage will reflect 'Current' in the “Elig Status column”

Selecting the correct member coverage after 10/15:

- During the predetermination period agents should search for members using the **member's name and date of birth. (As a reminder, three identifiers are required to validate member for all cases to be processed.)**
- If a current and future year account are returned (which can be determined by looking at the “Elig Status” column and “Eff Start Date”), select the current account first then proceed accordingly. After finishing current case then copy the case for future year review.
 - The future coverage account will have an effective start date of 1/1/2027 and an “Elig Status” of Future.
 - **When conducting a Predetermination review, you must ensure current review is conducted first before entering a case for future year**

Member ID	Plan Code	Eff Start Date	Eff End Date	Grp Eff Start Date	Grp Eff End Date	Elig Status
00	27MA0003	01/01/2027	12/31/2027	01/01/2027	12/31/2027	Future
00	26MA0002	01/01/2026	12/31/2026	01/01/2026	12/31/2026	Current

ePA Requests for Members with Multiple Coverages in Same Benefit Year

If a member has multiple coverages in the same benefit year as the request is being made (e.g., 2026 MAO and 2026 PDP), the request will route to a technician to select the correct coverage.

- Technicians will be presented with coverage from the benefit year the request is being worked under (i.e., if current year, presented with 2026 coverage only).
- Reference the ePA for Techs Job Aid on how to handle multiple accounts on ePA requests

WARNING: Failure to follow this process will result in immediate disciplinary action following the IRE Related Behaviors policy. If you have questions regarding this process, please reach out to your supervisor immediately to ensure understanding.

Step	Action
1	Refer to the Select Member sections of the Case Processing Job Aid for details on selecting the correct account and when a case is needed or not needed on additional accounts.
2	If alternative coverage is found, is there a case on the other account? • Yes: No action is required on the other account. Continue your case for the account that was populated per the standard process. • No: Continue the case for the current account AND create a case on the alternative coverage, if needed and proceed to step 3.
3	• If the technician selects a member from a market for which they are skilled to work, the technician will continue to work the case through following standard process. • If the technician selects a member from a market for which they are NOT skilled to work, complete the following: ◦ The case will route to the InBoundCorrWB. The technician may view the case in read-only to use the Copy Case function to enter a second case for the member's alternative account. If the copy case function is not available, then the technician must rework the case manually. Please refer to the Reworking Cases section of the Correcting Case Errors and Manual Tracking Job Aid. • If a general PA technician receives an ePA for a member with two dedicated carrier accounts, it is still the responsibility of that technician to ensure that all accounts are addressed. ◦ Complete the case for one of the two dedicated accounts, then create a second case for the alternate account. ◦ The copied case will NOT automatically route out of the technician's workbasket so the technician must request to have the case transferred to a dedicated agent.

Merging Cases

When merging cases agents will be able to see both current and future accounts. However, agents will only be able to merge requests for the same coverage year (i.e., while agents can see both current and future coverage, they cannot merge future year requests with current year requests or vice versa).

Action

Response to a Predetermination MPA

When merging a provider's response with an MPA request you must check to see if the MPA is a predetermination request. The provider's response may not indicate that a future year review is requested; however, it may be the response to a future year member-initiated request. Please check the Pre-benefit Determination field in the Additional Drug Info tab for any indication that a predetermination review was requested.

If this field indicates that the MPA is a predetermination request, proceed with the review using the appropriate future year tools. Additionally, consider if a current year case needs to be entered. Cancelling a case as no PA required when a review is needed is considered a compliance risk.

Drug Info	Additional Drug Info	Drug Eligibility (RxClaim)
Is this a Compound Drug ? No		
Fill Date :		
Daily dosage :		
Dispense Quantity : * 150		
Tier Exception/copay Reduction * No		
Pre-benefit Determination : True		
Req PA Start Date (This is for back dating only) : * 01/01/2027		
Drug Approval Level: GPI 12		

Current Year UM Criteria Check

When a predetermination request is received, agents must determine if current year UM criteria exists – meaning, you must verify no review is required for the current year before entering a request for predetermination review (an exception to this process exists for ePA cases).

- Utilize the logic below to determine which flowchart should be used for case entry:
 - Member only has a current year account: Utilize the Members with ONLY Current Year Account flowchart.
 - Member has current and future accounts: Utilize the Members with BOTH Current and Future Accounts flowchart.
- For requests with a denial on file, use the Review vs. Appeal chart to determine if the case should be reviewed or sent to Appeals.
- When entering a current year request because current year review is required, do NOT select the predetermination flag on the current year request.
 - The predetermination flag should **ONLY** be selected when the case is intended to be reviewed for predetermination

Future Year TCSE Requests

When a tier cost sharing exception (TCSE) predetermination request for a member with current year coverage is received, agents must determine if a review is needed for TCSE for the current year. The only exception to this would be when the medication is a Tier 1 medication in the current year.

Members with Current Account Only Flow Chart

Members with Current Account Only Flow Chart – Cont'

Members with BOTH Current and Future Accounts Flow Chart

Members with BOTH Current and Future Accounts Flow Chart... Cont.

Non-ePA Cases (Phone / Fax /Web)

For non-ePA requests, technicians will be responsible for determining which benefit year(s) requests should be entered under by utilizing available tools (e.g., formulary lookup, trial claims).

- If member has current year coverage and future year coverage, ensure the current year review is entered under the current year coverage account first before entering a case for predetermination review
- For current year review, ensure Formulary/Formulary Look Up and trial claim is referenced to determine if review is necessary
 - If review is required: proceed per standard current year review process
 - If no review is required: after ensuring successful trial claim, proceed to cancel your case per standard current review process

EPA Transaction List	Guideline Rules	Provider	Member	Benefit Info	Drug	Trial Claim	Formulary	Case Notes	Process Overrides	Correspondence Status	Verbal Communication	Case Details	Clinical Guidelines
Formulary Data													
Formulary Code :	O27MCORE						Formulary Name :	27002 MAPD CORE (MOCORE)					
Formulary Lookup													
Selected Drug :	ZEPBOUND INJ 2.5/0.5						Agent Notes :	Transition Safety MDD = 0.428572.					
Dosage :	Soln Auto-Inj												
CMS Drug Type :	Brand						Prior Authorization Required :	No					
BN - Brand name	ZEPBOUND						Part B vs Part D Determination Required :	No					
Generic Name	TIRZEPATIDE (WEIGHT MGMT) SOLN AUTO-INJECTOR 2.5 MG/0.5ML						Step Therapy :	No					
Formulary Status :	Non-Formulary												
Tier Status :	95						Quantity Limit :	Yes. 2.00 per 28 day(s).					
Specialty Pharmacy (Limited Access) :	No						Member Notes :	No					
							Alternatives :	No					

ePA Cases

For ePA requests, when the following question is asked **AND** the provider indicates that the request is a predetermination request (i.e., the answer reflects 2027), agents must determine if a current year review is required. Utilize the Current Year UM Criteria Check for Future Year ePA Requests (on next slide) to determine how to proceed for requests requiring current year UM criteria verification

- If the predetermination question does not populate in clinical guidelines, proceed to review case per standard current year review process

Is your request for the current benefit year (2026) or the next benefit year (benefits starting 1/1/2027)? SELECT 2026 if your request is for this benefit year (for example, patient is new to therapy and requires drug in 2026, you received a transition of care letter, the patient has a current authorization which ends prior to 12/31/2026). SELECT 2027 if your request is for the next benefit year (for example, therapy will NOT begin BEFORE 1/1/2027, the patient is a newly enrolling member effective 1/1/2027, the patient has an approval that expires on 12/31/2026 or later).

2027

If the aforementioned ePA question does not appear in the clinical guidelines section of the request, agents will not have to determine if a current year request should be entered. The system has already determined a current year request is not needed.

ePA Trial Claims

While trial claims for both 2026 and 2027 may be present (see screenshot below), the determination as to which year the request should be entered under and / or if a current year review is required will not be made via either of these trial claims. Instead, utilize the aforementioned logic to determine how to handle an ePA request during the predetermination period.

EPA Transaction List	Guideline Rules	Provider	Member	Benefit Info	Drug	Trial Claim	Fo		
<table><tr><td>Current 2026 Trial Claim</td><td>Future 2027 Trial Claim</td></tr></table>								Current 2026 Trial Claim	Future 2027 Trial Claim
Current 2026 Trial Claim	Future 2027 Trial Claim								

Knowledge Check #2

Q: During the predetermination period, how should agents search for members in PAS?

A: Agents must search for member by Name and DOB but must also validate a 3rd identifier to ensure the correct member is selected

Q: True or False: In order to merge with a predetermination MPA, the providers response must also specify predetermination review

A: False – the providers response may not specify predetermination is requested however, you must still merge with the pending MPA, check the paperclip note and if there is an indication of predetermination review, you must also ensure the pre-benefit determination flag is checked

Q: If a predetermination request is received for a member who only has current year coverage, can the request still be taken in?

A: Yes! Select the members account and ensure the pre-benefit determination flag is selected

Q: True or False: When a predetermination review is requested for a phone or fax case, you must also ensure there is no current year review required

A: True

Q: For ePA, when will you be required to conduct both a current and a future year review?

A: Only when the predetermination question is presented/asked in clinical guidelines and the provider answered as 2027

Trial Claims

- Predetermination requests approved under the current year eligibility because the future year eligibility is not yet loaded will have the trial claims processed by the Edit Team. These cases must be routed to the edit team in PAS by selecting Predetermination Trial Claim.
- Future year requests that are entered on a member's future year eligibility will have a trial claim processed on the member's future year coverage in PAS. If the trial claim is not successful, reach out to your leadership. Your leadership will then route the case to the Edit Team in PAS by selecting Predetermination Trial Claim.

Predetermination Requests Urgency & Turnaround Times

Predetermination requests will continue to follow the existing process for urgency. Processes include:

Business Process	Steps
Indexing	Indexers will index predetermination requests under the current year account with applicable urgency type. Please refer to the Handling Fax Requests Job Aid for further instructions on handling predetermination requests.
Fax, Phone, or Member-Initiated Request	Fax/phone/MPA Outreach agents will work all requests under the member's current year account if available with applicable urgency type ; otherwise, the future year account will be selected. Follow standard processes.

Predetermination Requests Urgency & Turnaround Times – Talking Points

When will I receive a decision on my request?

Once we receive supporting documentation, you may receive a decision between 24-72 hours for standard requests and within 24 hours for urgent requests.

If approved, when will my medication coverage begin?

Coverage granted through a predetermination request will not be effective until January 1st, 2027. Remember a predetermination request is for the 2027 benefit year.

If denied, will I be denied my medication?

Regardless of a predetermination request denial, your plan may allow you a transitional supply while your doctor requests an appeal of the decision. If transition is allowed, the first transaction of the new benefit year will process for a maximum of 31 days supply. If the transaction is denied, your pharmacy may contact the Help Desk department for assistance in processing, or Member Services for further details.

If denied, am I allowed to request an appeal? When can I request it?

Upon denial you are granted appeals rights. The appropriate time for you to exercise your rights is dependent on the date of your case submission.

Tech Note: Please refer to the [Review vs. Appeals](#) Grid.

I have not enrolled in a Medicare plan. Can my doctor submit my request now?

No, OptumRx is unable to review a request if your enrollment information is not finalized. If your enrollment is not finalized, OptumRx is unable to view or determine your benefits to decide if a PA is required. Once you have enrolled in a participating plan, you may contact your member services to determine when your benefits are viewable by OptumRx and when your doctor can submit the PA request.

Review vs. Appeals

The chart below does NOT apply to IBC Medicare or Fallon Medicare. Fallon cases with a denial on file within 65 days follow standard phone and fax processes regardless of the calendar year.

First Denied Request Received within Past 65 Days	Second Request for the Same Drug	ACTION: Review the Case or Send to Appeals
2026 request denied in 2026	2026 request reviewed in 2026 	Appeal
2026 request denied in 2026	2026 request reviewed in 2027	Review*
2026 request denied in 2026	2027 request reviewed in 2027	Review*
2026 request denied in 2026	2027 request reviewed in 2026	Review
2026 request denied in 2027	2027 request reviewed in 2027	Review
2027 request denied in 2026	2027 request reviewed in 2026 	Appeal
2027 request denied in 2026	2027 request reviewed in 2027	Review*
2027 request denied in 2027	2027 request reviewed in 2027 	Appeal

For action items marked with an asterisk (*), Appeal should be allowed if:

1. The request is on an appeals form or the caller/fax clearly indicates an appeal is requested; AND
2. PA confirms that the member is on the same plan.

How to Understand the Review vs. Appeals Chart

First Denied Request Received within Past 65 Days	Second Request for the Same Drug	ACTION: Review the Case or Send to Appeals	Example Scenarios
2026 request denied in 2026	2026 request reviewed in 2026	Appeal	Case A for current year review was denied on 10/15/2026. Case B for current year review was denied on 11/1/2026. Since we have a current year denial on file with Case A within 65 days, Case B must follow appeals process.
2026 request denied in 2026	2026 request reviewed in 2027	Review*	Case A for current year review was denied on 11/25/2026. Case B for current year review was denied on 1/1/2027. Since members get a clean slate at the start of each year, Case A is no longer considered since it was reviewed in the previous benefit year, therefore, Case B Must be reviewed. *If the 2nd review requests for an appeal, case must be forwarded to appeals
2026 request denied in 2026	2027 request reviewed in 2027	Review*	Case A for current year review was denied on 11/1/2026. Case B for current year review was denied on 1/1/2027. Since members get a clean slate at the start of each year, Case A is no longer considered since it was reviewed in the previous benefit year, therefore, Case B Must be reviewed. *If the 2nd review requests for an appeal, case must be forwarded to appeals
2026 request denied in 2026	2027 request reviewed in 2026	Review	Case A for current year review was denied on 11/1/2026. Case B for future year review was denied on 11/10/2026. Since current year request and future year request are not considered duplicates and must have their own review conducted, you will proceed to review the future year request.
2026 request denied in 2027	2027 request reviewed in 2027	Review*	Case A was received on 12/28/2026 but was not denied until 1/1/2027. Case B was received on 1/3/2027 Although Case A was denied in 2027, the request was received in 2026 making the request a 2026 request. When member entered new benefit year, they received a clean slate, thus voiding the 2026 request meaning, Case B must be taken in for review. *If the 2nd review requests for an appeal, case must be forwarded to appeals
2027 request denied in 2026	2027 request reviewed in 2026	Appeal	Case A for future year review was denied on 10/30/2026 Case B is received for future year review on 11/8/2026 Since we have a future year denial on file with Case A within 65 days, Case B must follow the appeal process.
2027 request denied in 2026	2027 request reviewed in 2027	Review*	Case A for future year review was denied on 11/25/2026 Case B for future year review was received on 1/1/2027 Since members get a clean slate at the start of each year, Case A is no longer considered since it was reviewed in the previous benefit year, therefore, Case B Must be reviewed. *If the 2nd review requests for an appeal, case must be forwarded to appeals
2027 request denied in 2027	2027 request reviewed in 2027	Appeal	Case A was denied on 1/15/2027 Case B was received on 1/17/2027 Since we have a denial on file with Case A within 65 days, Case B must follow the appeal process.

UHCM&R Diabetic Testing Supplies

- For members who do not have future year coverage loaded in PAS utilize the members current year benefit and review the case with the assumption that the member's benefits will remain the same in the future year.
- After the member's future year coverage has been loaded in PAS, utilize the following process to determine if a non-preferred testing supply review will be required in the future year.

Determining which Members Require Review

As mentioned, not all members will be subject to this review. The chart below will help you identify the MAPD and MA Only members who should undergo review.

Time of Review	How to Determine if Review Applies
Any member reviewed prior to January 1st	2027 Diabetic Testing Supplies Grid
Any member reviewed after future year coverage is loaded, and future year benefit information is loaded into PAS.	PAS formulary information or rejection

How Does the Diabetic Testing Supply Grid Work?

In the predetermination period, there will be instances where you will need to refer to the grid (retired after the predetermination period) to determine if the member will be subject to PA.

1. Locate the Benefit Code in the Member tab of PAS.
2. Use the Ctrl+F function to search for the member's Benefit Code in the grid. Ensure there are no spaces before or after the Benefit Code once you've pasted it into the search field.
3. Select Find Next.
4. If the Benefit Code is found on the grid in the RxBenefit Code column, the member is subject to review of non-preferred testing supplies in the future benefit year.

**This means you should proceed with review for predetermination*

The first screenshot shows the 'Member' tab in the PAS system. The 'Benefit Code' field is highlighted with a blue box and a red circle with the number 1. The benefit code 'MA7J7' is visible.

The second screenshot shows the '2027 Benefit Code (M&R System Code)' grid. The grid lists various benefit codes. The code 'MA217' is highlighted with a blue box and a red circle with the number 4.

The third screenshot shows the 'Find and Replace' dialog box. The 'Find' field contains 'MA217' and the 'Find Next' button is highlighted with a red circle with the number 3.

UHCM&R Preferred Supplies

The preferred testing supplies listed in the Medicare Testing Supplies for Techs Job Aid will continue to be preferred.

Preferred Blood Glucose Monitors and Test Strips*

Knowledge Check #3

Q: For MAPD and MA Only members, how will you determine a predetermination review is required for Diabetic Testing Supplies?

A: You must use the 2027 Diabetic Testing Supplies Grid to verify if review is necessary for future year

Q: For UHCM&R what is the Diabetic preferred testing meters?

A: Accu-Check Guide, Accu-Check Guide Me, Contour Next EZ, Contour Next Gen, Contour Next One, Contour Plus Blue

Q: For UHCM&R what is the Diabetic preferred testing strips?

A: Accu-Check Aviva Plus, Accu-Check Guide, Contour, Contour Next, Contour Plus

Book A Predetermination Reviews

Unless specifically stated otherwise, Book A clients do not allow for predetermination review beginning October 15th.

- For plans that do not allow pre-determination review, technicians should NOT elect the pre-benefit Determination flag.
- Additionally, if a predetermination request is received before an official predetermination period start date is communicated, the request should be canceled using the Not Yet Eligible cancel reason code (unless plan-specific verbiage is available) and the verbiage below.
 - *PA-<*> has been cancelled for <*drug*>, use as directed, for the following reason: Pre-benefit determination reviews for the 2027 Part D benefit are not yet available for this plan. Please resubmit your prior authorization request for the 2027 benefit year beginning January 1, 2027.*
 - Remember to check for Current Year UM criteria and to follow all MPA cancellation processes if the request is an MPA.

Book A Clients Allowing Predetermination Review

The following table lists clients that have elected predetermination review and provides termination verbiage for requests that are received before the specified predetermination start date (use the Not Yet Eligible cancel reason code to cancel these requests).

Plan	Verbiage
10/15/2026	
BCBS-SC	PA-<*> has been cancelled for <*>, use as directed, for the following reason: Pre-benefit determination reviews for the 2027 Part D benefit are not yet available for this plan. Please resubmit your prior authorization request for the 2027 benefit year beginning October 15, 2026.
Compass Rose	
Eternal Health	
Samaritan	
Union Pacific	
11/01/2026	
Clover Health	PA-<#*> has been cancelled for <*>, use as directed, for the following reason: Pre-benefit determination reviews for the 2027 Part D benefit are not yet available for this plan. Please resubmit your prior authorization request for the 2027 benefit year beginning November 1, 2026.
KelseyCare Advantage	
MPSERS	
Provider Partners Health Plan (PPHP)	
Quartz	
State of New Jersey	
12/01/2026	
AlohaCare	PA-<#*> has been cancelled for <*>, use as directed, for the following reason: Pre-benefit determination reviews for the 2027 Part D benefit are not yet available for this plan. Please resubmit your prior authorization request for the 2027 benefit year beginning December 1st, 2026.
BCBS-AZ	
CareOregon (CORMCARE)	
Fallon	
IBCMEDDNJ	
IBCMEDDPA	
MGBHP	
Sanford	

New Book A Medicare Clients

New Book A Medicare Clients

Plan Name	Carrier Code(s)	RxCLAIM Instance	Notes
American Postal Workers Union (APWU)	EGWPS065 EGWPS066		
Clover Health	CLO8556 CLO8712 CLO22CA		
Government of Guam			

*These plans are migrating from Book 1 to Book A. For UAW and John Deere specific processes, refer to the UAW and John Deere [section](#).

Authorization Expiration Reviews

Unless the request originated as an ePRO, follow the process outlined below for Book A Medicare clients that do not allow predetermination reviews. As a reminder, follow standard practices for cases that originated an ePRO.

- If a future year review is specifically requested, the request should be cancelled as Not Yet Eligible.
- If there is an authorization, determine if a request can be taken in by looking at the Allowed-From Reauth Date in PAS. If the Allowed-From Reauth Date does not indicate a request can be reviewed and a secondary review is NOT requested, the request should be cancelled per standard processes.
- If there is an authorization on file and the Allowed-From Reauth Date indicates a new request can be reviewed, follow standard process to enter the request for current year review.

IBC Medicare (IBCMEDD) will allow for 2027 predetermination reviews beginning 11/01/2026. When reviewing IBC Medicare requests, keep the following in mind:

- Utilize the following chart when determining if a request should be reviewed or sent to Appeals:

First Denied Request Received within Past 60 Days	Second Request for the Same Drug	ACTION: Review the Case or Send to Appeals
2026 request denied in 2026	2026 request reviewed in 2026	Appeal
2026 request denied in 2026	2026 request reviewed in 2027	Appeal
2026 request denied in 2026	2027 request reviewed in 2027	Appeal
2026 request denied in 2026	2027 request reviewed in 2026	Review
2026 request denied in 2027	2027 request reviewed in 2027	Appeal
2027 request denied in 2026	2027 request reviewed in 2026	Appeal
2027 request denied in 2026	2027 request reviewed in 2027	Appeal
2027 request denied in 2027	2027 request reviewed in 2027	Appeal

- Future Year Coverage Not Found: If future year review is requested but the member does not have future year benefits loaded in PAS a predetermination review CANNOT be performed. In this instance, determine if current year review is required by using available tools (e.g., formulary lookup).
 - If current year review is required, proceed with the current year review under the member's current year account following standard processes and make sure the following Call Detail note is entered:
- Future year review requested. No future year account found. However, current year review also required.
 - If current year review is not required and there is no future year account loaded, the case should be cancelled as Member Not Found.

BCBS-SC Predetermination Processes

The predetermination period for BlueCross BlueShield South Carolina (BCBS-SC) begins 11/1/2026. When reviewing predetermination requests for BCBS-SC, keep the following in mind:

- BCBS-SC members may have multiple accounts with different member ID numbers. When entering cases, search for the member by name and date of birth to ensure that all accounts for that member are visible. Select the Medicare coverage instead of the Medigap plan.
- Below is an example from the 2021-2022 predetermination season

Member ID	Member Last Name	First Name	Carrier Code	Account Code	Group Code	Plan Code	EF Start Date	EF End Date	Grp EF Start Date	Grp EF End Date	Elig Status
ZH6			BXMD01A77	60000	771400003	MBXMD0200	01/01/2020	12/31/2020	01/01/2020	12/31/2020	Current
ZCF			BXG001GIO	60000	620000000	BXG12001	01/01/2021	12/31/2020	01/01/2020	12/31/2020	Future
NB0			BXMD01A78	60000	771400003	MBXMD0210	01/01/2021	12/31/2020	01/01/2021	12/31/2020	Future

Do NOT select the Medigap Plan (carrier code BXG001GIO and Plan Code BXG12001)

- A future year review cannot be performed if the member does not have future year benefits loaded. If a future year review is requested and future year benefits are not loaded, determine if a current year review is required by using available tools (e.g., formulary lookup) or if an ePRO was sent from the members current year account (refer to the Identifying ePRO Cases section of the ePRO Reviews Job Aid).
 - If an ePRO was sent, handle the request using the Handling Instructions for ePRO vs Predetermination section.
 - If a current year review is required, proceed with reviewing under the member's current year account, following standard current year processes. Add the following Call Detail note to the current year case:

Subject: Future Year Review Request

Body: Future year review requested. No future year account found. However, current year review also required.

- If a current year review is not required and there is no future year account loaded, the case should be cancelled as Member Not Found. Add the following Call Detail note to the cancelled case:

Subject: Future Year Review Request

Body: Future year review requested; no future year benefits loaded. Current year review not required.

Thank you for the continued support and collaboration as we continue to strive for IRE prevention!
